

# TRANSPORT ME APP

## What is Transport Me?

Transport Me is an electronic passenger management system, similar to Translink's Go Card system. It allows you to set a stop as your favourite track the bus in real time and receive a free push notification letting you know if it is on time or has been delayed.

## So how does it work?

All Brisbane Bus Lines vehicles are fitted with card readers and a tablet running the Transport Me application. Students will be required to 'touch on' when boarding a bus and also 'touch off' when disembarking using the card reader.

## Where can I get the Transport Me mobile app?

You can download the app from the Apple Store or Google Play

## How to use the Transport Me mobile app

When you open the app, the home page appears (below) with 3 options, only select "Save a Stop and Get Notified". The select "Look up Stops" and select the route MCA 1 - AM, MCA 1 - PM or MCA 2 - AM, MCA 2 - PM. Then select the stop you wish to save and then select "Save Stops".

The app will now display a map, showing you where the bus currently is (if it is running - little bus icon), where your stop is (bus stop icon) and where you are (if your gps/location is turned on - blue dot). You can zoom in on this map also, to follow your bus along the streets, or you can exit the app, and when the bus gets to your saved stop, you will receive an app notification.
